Graduated cylinder reading technique

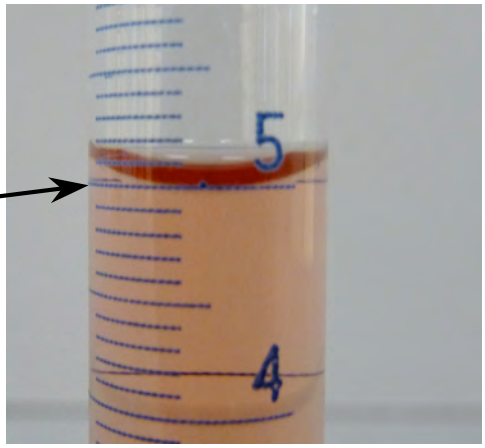

-1-	
I check the scale of the cylinder.	

-2-	
I carefully pour the liquid to be measured into the cylinder.	

-3 -	-4-
I position myself so as to have my eyes at the same height as the bottom of the curve of the liquid (miniscus).	I read the volume of my liquid and note the result.

For this example, the volume of the liquid is:

-5-
Using a transfer pipette or a dropper, I add or remove some liquid (if necessary).
